

EDUCATION SERVICES LEADING THE FUTURE OF LEARNING

Are you interested in becoming a teaching professional?

Get immersed in a project-centered course. Participate in internships, mentorships, networking, and virtual education experiences online. Experience educational technology using 21st century skills. Experience the true teacher-classroom experience.

Do you want a class that allows you hands-on experience?

Participate in a student teaching experience that allows an in-depth study and project-based learning. Apply skills acquired into a hands-on, real-life relationship with students, administration, and teaching peers. Students will leave the course with skills and portfolio credentials similar to those of students in collegiate teacher education preparatory programs.

Do you want a class that connects you to cutting edge technology in the classroom?

Explore educational technology through the latest research. Work with students and teachers to substantiate the power of technology in education. Students will collaborate with technology while partnering with teacher education professionals and mentors via 21st century technology.

Who can take this class? Juniors and Seniors

What prerequisites are required? None

Why should I take this course?

Twenty (20) hours toward mentoring responsibilities for the A+Program can be earned per semester. Learn 21st century skills and technology. Make a difference in people and the world. Help shape the future.

Virtual education experiences online.

Park Hill School District Professional Studies

The Park Hill Professional Studies program provides authentic learning experiences aligned with students' interests and talents that lead to post-secondary educational career success through classroom instruction and professional relationships.
